

# EU AI Act: which rules apply to you?

\*version of 14 June 2023

## Definitions

**Provider:** any individual, company, public authority or agency, that either develops an AI system or has one developed and introduces it to the market or uses it themselves, whether for payment or for free

**Deployer:** any individual, company, public authority or agency, under whose authority the system is used

**Manufacturer:** any individual or company that produces or creates (a product which includes) an AI system

**Distributor:** any individual or company in the supply chain, excluding the provider or importer, that makes an AI system available on the EU market

**Importer:** any individual or company in the EU that places an AI system on the market that has the name or trademark of an individual or company from outside of the EU on it

**Representative:** any individual or company in the EU who has received and accepted a written mandate from a provider of an AI system to perform and carry out on its behalf the obligations of the AI Act

**AI system:** a system intended to function autonomously and has the capability to generate outputs, such as predictions, recommendations, or decisions, with the explicit or implicit aim of influencing physical or virtual environments

**Foundation model:** an AI system that undergoes training on extensive data sets, with the aim to generate outputs that possess a broad scope of applicability

**Safety component of a product or system:** a part that has a critical safety function. If this component fails or malfunctions, it can endanger the health and safety of users.

**Significant risk** is determined by the combination of its severity, intensity, probability of occurrence, duration of effects, and its potential to impact individuals, groups, or specific categories of people

## Additional obligations

- Codes of conduct
- AI system interaction: transparency
- General principles for AI systems
- Existing legislation
